---

1. Login

Accessing the Application

- **Development mode**: `http://localhost:5173`
- **Production mode**: `http://localhost:3002`
- **Desktop application**: launch from the Start menu

Logging In

1. Enter your email address in the **Email** field
2. Enter your password in the **Password** field
3. Click **Log In**

Default administrator account:

Field	Value
Email	`admin@khazane.dz`
Password	`admin123`

> ⚠️ *Change this password immediately after first login in production.*

After a successful login, you are redirected to the **Dashboard**.

---

2. Dashboard

The dashboard is the application's home page. It displays a summary view of activity.

Statistics Cards

Four real-time indicators are displayed at the top of the page:

Indicator	Description
Active Products	Total number of products in the system
Recent Movements	Number of latest movements
Active Alerts	Triggered stock threshold alerts
Total Operations	Overall volume of operations

Quick Actions

Four buttons allow you to quickly create a stock movement:

- **Entry** (green) — Receiving goods
- **Exit** (red) — Shipping / consumption
- **Transfer** (blue) — Moving between locations
- **Adjustment** (gray) — Inventory correction

Clicking a button directly opens the movement form pre-filled with the corresponding type.

Recent Movements

A table displays the 10 most recent stock movements with:

- Movement reference
- Type (colored badge: green/red/blue/yellow)
- Related product
- Quantity
- Date and time

---

3. Product Management

Accessible via the sidebar menu **Products**.

Viewing Products

- The list displays all products paginated (20 per page)
- Use the **search bar** at the top to filter by name, SKU, or barcode
- Navigate between pages with the pagination buttons at the bottom

Creating a Product

1. Click the **+ New Product** button
2. Fill in the form:

Field	Description	Required
Name	Product name	✅
SKU	Unique Stock Keeping Unit code	✅
Category	Product category	❌
Unit of Measure	unit, kg, g, L, mL, m, m^2, m^3, carton, pallet, lot	✅
Barcode	EAN/UPC barcode	❌

3. Click **Create**
4. The product appears in the list

Importing Products (Excel/CSV)

1. Click the **Import** button (Upload icon)
2. Select an Excel (`.xlsx`) or CSV (`.csv`) file
3. The import runs automatically
4. A confirmation message shows the number of products created and updated
5. If there are errors, the number of failed rows is displayed

Exporting Products (Excel)

1. Click the **Export** button (Download icon)
2. A file `produits-khazane.xlsx` is automatically downloaded
3. The file contains all products with their full information

---

4. Stock Movements

Accessible via the sidebar menu **Movements**.

Movement Types

Type	Icon	Color	Usage
Entry	↓	Green	Receiving, purchasing, production

Exit	↑	Red	Shipping, consumption, sales
Transfer	↔	Blue	Moving from one location to another
Adjustment	⚙	Yellow	Inventory correction, damage, expiry

Creating a Movement

1. Click one of the **Entry**, **Exit**, or **Transfer** buttons at the top of the page
2. Fill in the form:

Field	Description	Required
Product	Select the relevant product	✅
Quantity	Number of units	✅
Source Location	Where stock comes from (exit/transfer)	Depends
Destination Location	Where stock goes (entry/transfer)	Depends
Supplier	Supplier (if type is Entry)	❌
Client	Client (if type is Exit)	❌
Notes	Free-text comment	❌

3. Click **Validate**
4. Stock is updated automatically
5. The movement appears in the list and on the dashboard

Viewing History

- The list displays all movements paginated (20 per page)
- Each movement shows: reference, type (colored badge), product, supplier, client, quantity, operator, date

Stock Exit Voucher (Printable)

A printable exit voucher can be generated from the Movements page:

1. Click the **Exit Voucher** button at the top of the page
2. A formatted document is displayed with:
   - Auto-generated voucher number (`BS-YYYYMMDD-HHMM`)
   - Table of latest **Exit** type movements (reference, product, quantity)
   - Automatic **total quantity** calculation
   - Signature areas (issued by / received by / manager)
3. Click **Print** to open the browser's print dialog

> *The exit voucher automatically adapts to the active language (RTL for Arabic).*

---

5. Alerts

Accessible via the sidebar menu **Alerts**.

How It Works

Alerts are automatically generated when a product's stock falls below a configured threshold (see [Settings > Thresholds]).

Alert Statuses

Status	Color	Icon	Description
Triggered	Red	⚠️	Threshold reached, action required
Acknowledged	Yellow	🕐	Taken into account, processing
Resolved	Green	✅	Stock replenished, alert closed

Displayed Information

For each alert:

- **Product** concerned
- **Current quantity** in stock
- **Threshold** configured
- **Status** with colored badge
- **Date** of trigger

---

6. Storage (Sites / Zones / Locations)

Accessible via the sidebar menu **Storage**.

Storage Hierarchy

The application uses a three-level organization:

```
Site (Warehouse / Store)
  └── Zone (Aisle / Sector / Dock)
        └── Location (Shelf / Rack / Pallet)
```

Viewing Sites

The page displays the list of storage sites with:

- **Name** of the site

- **Code** (unique, e.g.: `ENT-01`)
- **Type** (Warehouse, Store, etc.)
- **Address**

Pre-configured Data (Seed)

Level	Code	Name	Details
Site	ENT-01	Entrepôt Principal	Zone industrielle, Alger
Zone	A1	Allée 1	Type AISLE
Locations	A1-01 to A1-05	Shelf 1 to 5	Max capacity: 100 units

---

7. Suppliers

Accessible via the sidebar menu **Suppliers**.

Viewing Suppliers

- The list displays all suppliers paginated (20 per page)
- Use the **search bar** to filter by name, code, or contact
- Click a supplier to expand details (contact, address, NIF, linked products)

Creating a Supplier

1. Click the **+ New Supplier** button
2. Fill in the form:

Field	Description	Required
Code	Unique supplier code	✅
Name	Company name	✅
Contact	Contact person name	❌
Email	Email address	❌
Phone	Phone number	❌
Address	Postal address	❌
NIF	Tax identification number	❌

3. Click **Create**

Exporting Suppliers

1. Click the **Export** button (Download icon)
2. The file is automatically downloaded

Deleting a Supplier

- Click the **Trash** icon in the supplier's row
- Confirm the deletion

---

8. Clients

Accessible via the sidebar menu **Clients**.

Viewing Clients

- The list displays all clients paginated (20 per page)
- Use the **search bar** to filter by name, code, or contact
- Click a client to expand details (type, contact, address, NIF, movement count)

Client Types

Type	Badge	Description
COMPANY	Blue	Company / Corporation
INDIVIDUAL	Purple	Individual person
GOVERNMENT	Amber	Government body
OTHER	Gray	Other

Creating a Client

1. Click the **+ New Client** button
2. Fill in the form:

Field	Description	Required
Code	Unique client code	✅
Name	Name or company name	✅
Type	COMPANY / INDIVIDUAL / GOVERNMENT / OTHER	✅
Contact	Contact person name	❌
Email	Email address	❌
Phone	Phone number	❌
Address	Postal address	❌
NIF	Tax identification number	❌

3. Click **Create**

Exporting Clients

1. Click the **Export** button (Download icon)
2. The file is automatically downloaded

Deleting a Client

- Click the **Trash** icon in the client's row
- Confirm the deletion

---

9. Global Search

Accessing the Search

- Click the **search bar** in the top navigation bar
- Or use the keyboard shortcut **Ctrl + K**

Usage

1. Type at least 2 characters in the search bar
2. Results appear instantly (real-time search with 300 ms debounce)
3. Results are grouped by category:

Category	Icon	Searched Fields
Products	📦	Name, SKU, barcode
Categories	🗂️	Name + number of associated products
Movements	↔️	Reference, type, associated product
Locations	📍	Label, code, parent zone and site

Voice Search 🎤

If your browser supports voice recognition (Web Speech API):

1. A **microphone** button (🎤) appears to the right of the search bar
2. Click it to start listening (the button pulses red)
3. Speak clearly — the recognized text is automatically entered in the search bar
4. Click again to stop listening

> *Compatible with Chrome, Edge, and Chromium-based browsers.*

Navigating Results

- Use the ↑ and ↓ arrow keys to navigate
- Press **Enter** to open the selected item

- Press **Escape** to close the search

---

10. Settings

Accessible via the sidebar menu **Settings**. The page contains 5 panels.

Appearance (White-label)

Customize the application's look and feel:

Option	Description
Primary Color	10 predefined colors + custom hue slider
Sidebar Mode	Light or dark
Application Name	Replace "Khazane-DZ" with your brand
Logo	Upload an image file (PNG, JPG, SVG or WebP — max 2 MB)

Changes are applied immediately and saved in the browser (localStorage).

Language

Select the interface language:

Language	Code	Direction
Français	FR	LTR
English	EN	LTR
العربية	AR	RTL

Selecting Arabic automatically switches the interface to **right-to-left** (RTL) mode.

User Management

- **View** the list of users with their role and email
- Each user displays a colored badge based on their role:

Role	Badge
ADMIN	Red
MANAGER	Blue
OPERATOR	Green
VIEWER	Gray

Custom Fields

Add extra fields to product records:

1. Click **+ Add Field**
2. Fill in:
   - **Name** of the field (e.g., "Net Weight", "Supplier")
   - **Type**: TEXT (by default)
   - **Required**: yes/no
3. Click **Create**

To delete a field, click the **Trash** icon next to the field.

Stock Thresholds

Configure alert thresholds to be notified when stock is low:

1. Click **+ Add Threshold**
2. Select the **product**
3. Set the 3 thresholds:
   - **Minimum stock** — quantity below which an alert is triggered
   - **Safety stock** — additional safety margin
   - **Reorder point** — quantity at which a replenishment order is recommended
4. Click **Create**

When a product's stock falls below the threshold, an alert is automatically triggered (visible in the **Alerts** page).

Categories

Manage the product category tree:

1. Click **+ Add Category**
2. Enter the **name** of the category
3. Optionally select a **parent category**
4. Click **Create**

Categories support unlimited nesting (categories and subcategories).

---

11. Roles and Permissions

The application uses a Role-Based Access Control (RBAC) system with 4 levels:

Role	Description	Access
ADMIN	Full administrator	Full access, settings, user management
MANAGER	Site manager	Products, movements, alerts management
OPERATOR	Stock operator	Movement creation, read access

VIEWER	Read-only	Read-only access to all pages

Users are assigned to one or more storage sites, limiting their scope of action.

---

12. Keyboard Shortcuts

Shortcut	Action
Ctrl + K	Open global search
↑ / ↓	Navigate search results
Enter	Open selected result
Escape	Close search / modal

General Navigation

Sidebar

The sidebar menu provides access to all sections:

Icon	Section	Description
📊	Dashboard	Activity summary view
📦	Products	Product catalog management
🏢	Storage	Sites, zones, locations
↔️	Movements	Movement history and creation
⚠️	Alerts	Stock threshold alerts
🚚	Suppliers	Supplier management
👥	Clients	Client management
⚙️	Settings	Application configuration

Top Navigation Bar

- **Site selector**: choose the current working site
- **Global search**: search bar (or Ctrl+K)
- **Notifications**: bell icon for recent alerts
- **Profile**: access to connected account information

Swagger API

Full REST API documentation is available at:

```
http://localhost:3002/api
```

It allows you to test all endpoints directly from the browser.
